

Oleg Pykhonin

Frontend Developer (React / Next.js)

Berlin | +49 176 43564301 | opykhonin@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Over 4 years of experience. Specialized in React, Next.js and TypeScript. Building scalable web applications for international clients with thousands of active users.

SKILLS

Frontend: HTML5, CSS3, SCSS, Tailwind CSS v4, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React 18, Next.js 16 (App Router, Server Actions), Redux, Redux Toolkit, Zustand, React Router, React Hook Form, NextAuth / Auth.js, Zod

API & Tools: GraphQL (Shopify Storefront API), REST API, Axios, Fetch API, Git, GitHub, Vercel, Cursor, GitHub Copilot, Claude Code, ESLint, Prettier, NPM

Testing & Methodik: Jest, React Testing Library, Agile, Scrum, Jira

UI/Design: Figma (Design Handoff), Responsive Design, Mobile-First

WORK EXPERIENCE

Frontend Developer

Fusion Tech, Remote

03/2023 – 06/2026

- Developed complex UI features for e-commerce and content platforms (including 10+ interactive product finders and multi-step user journeys) from concept to go-live.
- Designed a modular frontend architecture with 25+ reusable components, significantly improving maintainability and extensibility.
- Integrated GraphQL interfaces (including Shopify Storefront API) and reduced network payloads by around 20% by selectively removing unused fields from queries.
- Built state-driven multi-step wizards with localStorage persistence for uninterrupted user flows across multiple sessions.
- Identified and resolved frontend performance bottlenecks through lazy loading, code splitting, and image optimization, improving Core Web Vitals in Google Lighthouse to 90+ scores.

Project-based Work | Culture & Media · Berlin

08/2016 – 02/2023

Frontend Developer

DEFA, Moscow

03/2013 – 07/2016

- Developed UI components and landing pages for 10+ enterprise clients using HTML5, CSS3 and jQuery.
- Implemented responsive, cross-browser compatible layouts (IE8/9, Chrome, Firefox) with a mobile-first approach.
- Performance optimization through CSS minification and JS cleanup — page size reduced by 20–25%.
